Project INTRODUCTION

Kaveri Result management system is system where all aspect related to results of college has handled

Theses aspects involves managing information about Students such as personal details. Various subjects their internal, external, total & grades etc. Status of student weather passed or failed . Total grade points and credits gained organized in a tabular form like excel files

Based on that system generates analysis report categories in
gender, status percentage and so on....

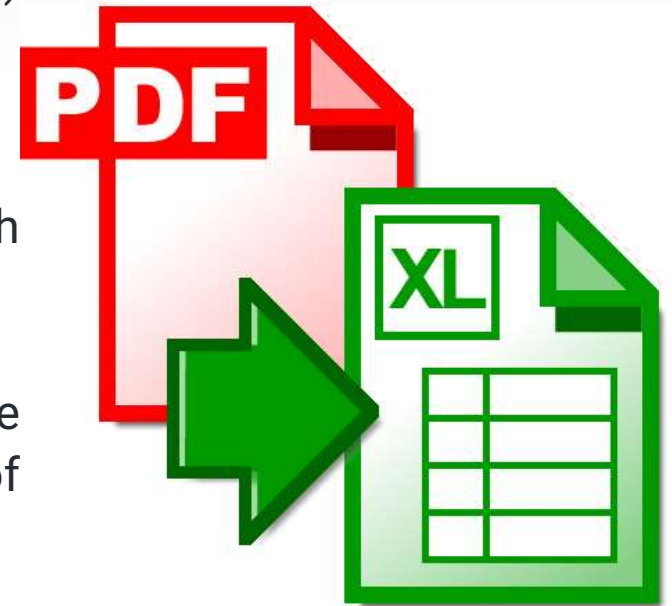

Existing System

Manual system receives Results of students in .pdf format from SPPU which later on stakeholders(teachers/faculty) organizes that pdf file data into tabular form so that it will be easy to under stand and analysis

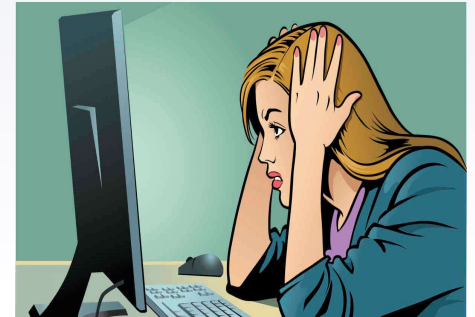

System requires continuous monitoring to ensure each record has inputted into Excel sheet correctly

A manual result management system relies heavily on the actions of teachers which increases the possibility of human error.

Problem Statement

Record tracks & concentration : Keeping track of records is another difficult controlling measure with manual systems. A manual system requires the teacher to write down the record came while passing pdf. This can be a difficult task, as one may lose the list of record or another may forget to write down a sale.

Mental and Physical exhaustion: Over the period of time extreme concentration and focus may cause irritation and frustration for teachers that lead to poor eye sight, back pain and fatigue, dizziness and many more problems

Time consumption: This system is mainly focusing on reducing time consumption of pdf parsing and excel entering against huge student records of 60+ pages

Proposed System:

To reduce the shortcomings of the Existing system there is a need to develop a new system that could upgrade the status of the current system which was manual and slow to the system that will be automatic and fast.

The new system should be concern with offering the requirements of the customer, the system should be reliable, easier, fast, and more informative.

System also concerns their requirements, It also shows the overall analysis more accurately.

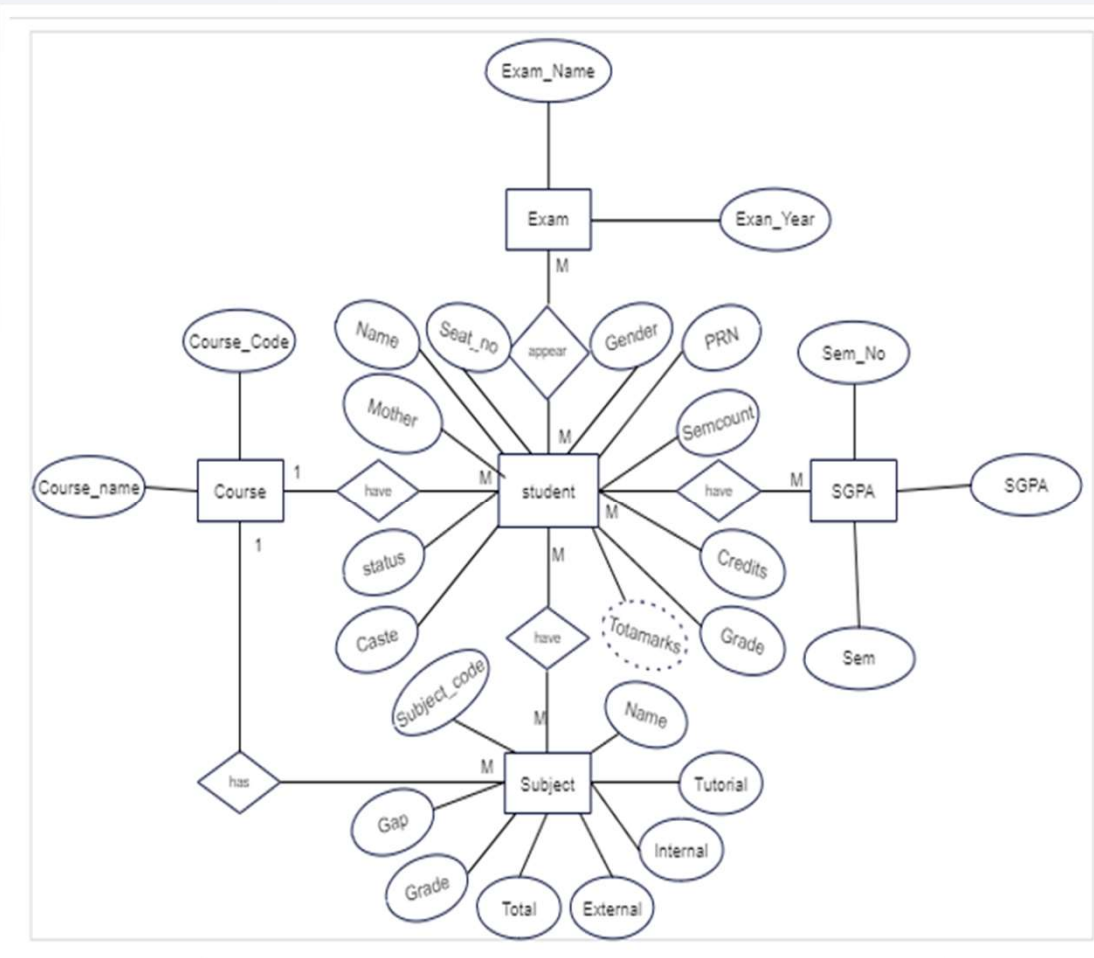

The new system should possess the qualities stated below.

- 1.Reduction in processing time.
- 2.Error reduction.
- 3.Improve reporting accuracy
4. Automatic production of the documents and Reports.
- 5.Faster response time.
6. Ability to meet user requirements
7. Reduction in man power.
8. Provides more

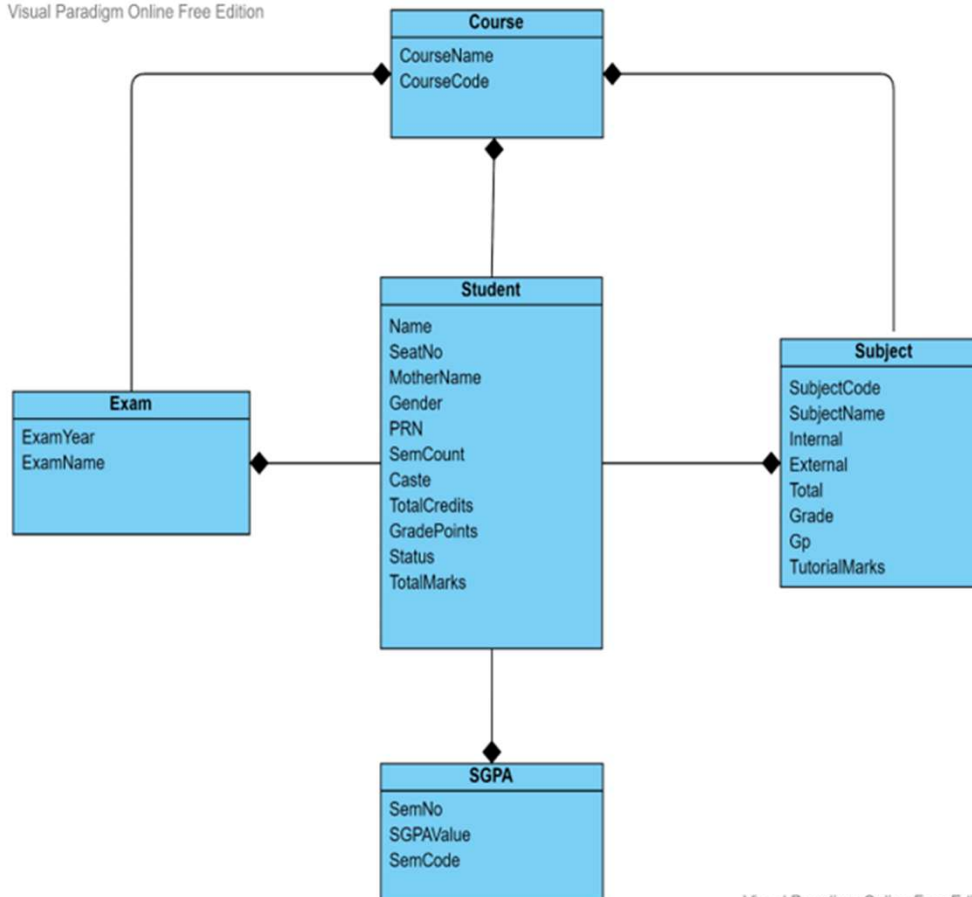

Stable Mental and physical Health

Project Implementation

FileInputStream: Open read write file in form of byte sequence

org.apache.pdfbox: Tool for working with Excel

PDDocument: creates empty PDF also used static method

PDFTextStripper: Ignore formatting strip out all text

org.apache.poi: create, modify, and display MS Office files using Java programs.

XSSFWorkbook: one can create Excel sheet, rows and columns

Array List: to store student data subject data we are using array list class

Hash Map: Unique Column name there will be column number assigned to it.

Technology

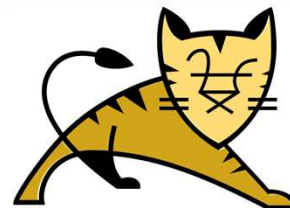

MavenTM

1. JAVA (J2EE)
2. Eclipse IDE
3. HTML & CSS & JSP
4. Maven
5. Selenium
6. Apache Web server
7. JDBC & MYSQL & Xampp
8. TestNG
9. GitHub
10. Chrome

 **GitHub**

TestNG

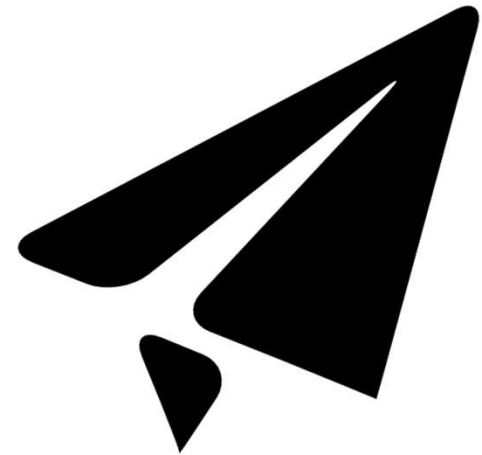

Limitations

- Normal user like faculty cannot edit or modify after score entered into database but they could do change after downloading excel.
- This System is totally made for faculty which limit system where student cannot access.
- If there is problem or error exists in PDF file which SPPU has provided so it may lead to lose of student data.

Future Scope

- Faculty can send the particular report analysis directly to higher authority within system.
- Solve all limitations and drawbacks of the projects

Work Done Till Date

1. Project Understanding
2. Project Documentation *
3. Static Pages creation
4. Data base creation, eclipse project setup
5. Template(classes creation)
6. PDF reading code
7. Array parsing for Courses like MSC and MCOM
8. Excel file Creation
9. Testing issue dentification
10. resolved the issue of subject lost and semester count
11. BCOM and rest course array parsing and excel creation as started last week triggered issue

THANK YOU
